Steven Metz, Ph.D.
LTC James Kievit
Strategic Studies Institute
U.S. Army War College
Carlisle Barracks, PA 17013-5050

Dear Dr. Metz and LTC Kievit:

I read your Revolution in Military Affairs and Conflict Short of War with great interest. Noting that you encourage discussion and debate on this subject (and presuming that the average U.S. citizen is not to be excluded from these discussions and debates), I would like to comment on this paper.

First, I noticed a rather curious omission in your paper, namely, the impact of a "revolutionized" military upon the rights of U.S. citizens as they might be inferred to exist under Article IX of the United States Constitution. True, you have expressed some concern about potential "ethics" violations resulting from unconstrained evolutionary or revolutionary processes; however, I see no reference anywhere in your paper to the military's primary responsibility in upholding, protecting and defending the U.S. Constitution.

Absent any such reference, your use of the term, "ethics," becomes relativistic, in my opinion--more suited, perhaps, to discourses by followers of Nietzsche. This is not a criticism, incidentally. If you are unprepared to discuss an RMA in the context of its impact on the U.S. Constitution, then I will spare you the hassle, since what I am about to propose is similarly bereft of any such considerations.

At the conclusion of your paper, you expressed a concern that the U.S. Army is being left in the wake, so to speak, of our far more technologically-oriented U.S. Navy and U.S. Air Force. I frankly do not see that the Army is being left behind. To the contrary, the Army has the potential for playing quite a major role in the scenario which I am about to propose, thanks to posse comitatus.

You raised a number of questions concerning the RMA as an evolutionary or a revolutionary process; and, concerning the latter, in the context of "chicken or egg" assessments (e.g., "Can military revolutions cause strategy to change, do strategic changes somehow generate military revolutions, or must they always occur simultaneously?" etc.) The scenario which I am presenting for your consideration involves a calculated evolutionary process culminating in a revolutionary event which will sweep the U.S. Army into its midst before appropriate (Army) strategies have been even vaguely contemplated.

Your paper contains all of the right elements for a successful (psychotechnologies, profit motives, manipulation of public opinion, deniability, crime as the public's inducement to sacrifice privacy, spiritual insurgency, etc. etc.); however,

your timing is off. These are not matters which should only now be considered; that is, not unless you are looking for an RMA some 30 years hence. These are matters which should have been considered 30 years ago and which, indeed, were.

I am not a military strategist, incidentally, so please consider the following as input from an ordinary U.S. citizen who wishes to be heard in the debate(s) focusing on RMAs. My proposal is a "homemaker's recipe" for a successful RMA if you will--embodying not only the ingredients which you have furnished in The Revolution in Military Affairs and Conflict Short of War, but, also, a few additional which you had not thought to discuss. My "recipe" is as follows:

A Successful RMA

^^^^^^^^^^^^^^^^^^

Ingredients:

- Satanic Cults
- UFO Cults
- Directed-Energy Technologies
- Neurocybernetics/Psychotechnologies
- Biotechnologies/Experimental Drugs
- Multinational Government Contractors and Subsidiaries
- Investment Portfolios and Other Financial Inducements
- Imported East Bloc Mercenaries and Military Equipment
- Imported Foreign National Scientists
- A Controlled and Compliant Media
- Decentralized U.S. Government Control
- An Induced Crime Wave

Instructions:

1. Raise one or two generations of children under the auspices of government-approved satanic cults, such as COL (USA ret.) Michael Aquino's Temple of Set. Violent sexual, physical and psychological abuse of these children over a period of 15 years will produce generations of dissociative automatons who will comply with instructions in obedient, unquestioning fashion. Their required adherence to cult tenets precludes any consideration of laws governing U.S. society, generally. Cult-programmed "graduates," among other things, will be expected to participate in contrived UFO abduction scenarios.
2. Create a global UFO cult, which will involve the abduction of citizens so as to foster an illusion that this earth is facing an extraterrestrial invasion. UFO abductees-of-preference will have an expertise in computer technologies, since that expertise will be required in future technocratic RMA scenarios. Use of experimental drugs, holographic projection capabilities, directed-energy technologies, induced auditory input, experimental aircraft, and special effects costuming and stagecraft, among other things, will be used to persuade abductees of the reality of their circumstances. Official denials regarding these events will employ reverse psychology, to ensure that all such denials are taken as official confirmation of an imminent and/or ongoing extraterrestrial

invasion. UFO abductees will be persuaded to worship their anticipated extraterrestrial "conquerors" in cult-enforced religious fashion. UFO cult networks will be controlled by U.S. Intelligence to limit infiltration and ensure that dissidents do not disrupt UFO Cult long-term agendas. Uncontrollable dissidents will be assassinated, preferably by directed-energy means. Dissociative satanic cult graduates will handle all such executions; i.e., when not actively lending logistical and theatrical support to UFO abduction operations.

3. Directed-energy surveillance and weapons technologies of ALL types will be used for purposes of spreading fear and confusion in the population at large (under deniable circumstances); for eliminating persons deemed "adversarial" to U.S. national security interests; and for spotting, assessing and manipulating potential recruits to RMA causes.

4. Neurocybernetics and other psychotechnologies will be used to sow confusion and hypochondria in the population at large. The symptoms and effects produced by these and other directed-energy technologies will parallel the effects produced by various microbes, viruses and chemical imbalances, thus compelling a large segment of society to seek medical intervention, which, in turn, will be a basis for their being used for medical experimentation under "voluntary" circumstances. Psychiatrists and psychologists will play an important role in these experiments, particularly where denying the efficacy of neurocybernetics/psychotechnologies is concerned. Citizens complaining of "hearing voices" will be used as a basis for (generously) government-funded, schizophrenic-related brain research, since comprehension and control of the human brain is critical to the sustained success of any long-term RMA. (Total control of the human mind may have to wait another century or so.) Satanic cult graduates, drug dealers, gang members recruited off the streets, and foreign nationals will be housed at black-funded government expense (under comparatively luxurious circumstances) and trained in the use of these directed-energy technologies. (Technicians who may be obliged to drive targeted U.S. citizens insane or to their deaths do not need to be burdened by considerations of morality, ethics or the U.S. Constitution.) (... Well, okay, maybe one reference to the Constitution.)

5. Mix biotechnologies and experimental drugs generously throughout all of these ingredients. The unsuspecting U.S. citizen of today may be the cyborg soldier of tomorrow.

6. Multinational corporations under contract to the U.S. Government play a very important role in this recipe--particularly those engaged in the development of directed-energy surveillance and weapons technologies, and those in the business of telecommunications. Corporations and their subsidiaries will have the primary responsibility of experimenting on U.S. citizens with directed-energy technologies under appropriately-deniable circumstances; and of maintaining all records concerning the results of that experimentation. Corporations will also systematically install surveillance and

directed-energy targeting systems in government and other office buildings, in public establishments, in educational institutions, in apartment buildings, in neighborhoods, on streets and highways, and in prisons, jails and psychiatric institutions. The public's attention will *not* be drawn to the antenna arrays and other ground-based devices and wiring configurations being used for this purpose. The Ground Positioning Satellite (GPS) system will play an important part in these activities, with the expense to be sustained by government-funded contractors. Centralized control of these surveillance and targeting systems will be maintained in appropriately deployed bunkers, at an expense to be assumed by black-funded corporate contractors. Contractors may toy with these systems on an occasional basis, such as by bringing down an airliner or two for test purposes (such as, recently, near Pittsburgh); by inducing occasional targets of surveillance to erupt into acts of violence involving mass murder; and by assassinating occasional sports and public figures who exceed agreed-upon standards of mediocrity. However, no concerted large-scale effort is permitted until the ingredients of this recipe have obtained a "proper mix."

7. Investment portfolios and other financial inducements are critical to the long-term success of this pending RMA. There is much money to be had in the development of directed-energy systems and biotechnologies. Lucrative investment portfolios have a way of keeping Members of Congress, owners of the Major Media and other public officials silent. (Satanic cult "kiddies" trained as porn stars serve an equally useful purpose, as do demonstrations of the effectiveness of directed-energy technologies on more obstreperous types; however, greed has long been recognized as the primary mover and shaker in matters covert and should be exploited accordingly.) Financial inducements otherwise have a way of buying the continued cooperation of all persons participating in or directly knowledgeable of the ingredients in this recipe.

8. Out-of-work East Bloc military personnel and their vehicles and other equipment will be brought into this country under the guise of a "U.N." logo, to be housed under comparatively luxurious circumstances at black-funded corporate expense, for specialized urban/LIC training under otherwise-deniable DoD auspices. Use of a U.N. logo on incoming vehicles and uniforms is to spread confusion and fear in the populace at large, thus facilitating efforts by this government at eliminating that institution as a potentially effective tool for peaceful change. Imported East Bloc soldiers will be paid as mercenaries, for employment in this country only when a proper mix of this recipe's ingredients has been obtained.

9. Foreign national scientists, predominantly from the Far and Near East, and from Germany and Russia will be brought into this country to participate in such activities as brain and biophysics research as they pertain to the further development of neurocybernetics and other directed-energy technologies. Foreign national scientists, unlike most Americans, are not burdened by early indoctrination concerning human rights vis-a-vis lethal forms of involuntary human experimentation.

Foreign national scientists have also demonstrated a greater capacity for imaginative (and obedient) scientific research than exists indigenously in this country. Their brains must be picked.

10. A controlled and compliant media is critical to sustained deniability in this evolutionary process. The media will ignore complaints from U.S. citizens regarding growing evidence of police state actions in this country, while concurrently lauding the military's advanced technologies as being the "gentle" supplement to existing conventional weapons systems. The media will also ensure that the public's attention is kept diverted from more serious issues and, instead, that it is focused on hyped-up "sleaze" events, such as, The Kneecapping of Nancy Kerrigan, O.J. Simpson's Problems With Satanic Cult Murders, The Bobbing of Bobbitt, etc, etc. When pondering the national security implications of an Amy Fischer, the public is not likely to notice the antenna arrays springing up around this country like mushrooms, the inducing of "sick" office buildings and public establishments by directed-energy means on an ever-widening basis, or other similar indicators of an evolving RMA.

11. Decentralized government control--a panacea currently being sought by a befuddled American public to relieve their (contrived) economic woes--is one means by which FCC oversight can be permanently eliminated. FCC monitoring of communications frequencies might ultimately result in an untimely disclosure that those frequencies are being used to facilitate implementation of a successful RMA and should therefore be squelched. Decentralization will be employed selectively and with much diverting Congressional fanfare. Law enforcement agencies will be subjected to centralized control, as will those agencies and institutions such as the FDA which are currently engaged in biomedical research. With the help of a compliant media, the centralization of these latter types of agencies will elude public attention.

12. Crime in this country will be induced. The sales of illegal drugs and weapons reap profits which help to fund the foregoing. This activity is the preferred alternative to increased taxes, since tax increases tend to alienate a public which already has doubts about where its money is going. Drug dealers will be protected, since they play an important role in this recipe. Widespread addiction to illegal drugs and drug-sale profits will serve to eliminate and neutralize a large (parasitic) segment of society which might otherwise make undue demands for a "piece of the American Pie" (employment, education, etc.) Drug addiction fosters a certain degree of crime; however, to ensure that the public comprehends the need for martinet laws, expanded law enforcement capabilities and greater numbers of prisons, crimes of a sensational nature will be induced on a periodic basis which, with the help of the media, will lead to the public's voluntarily agreeing to sacrifice its privacy for safety. Neurocybernetics, psychotechnologies, biochemicals and directed-energy weapons and surveillance systems will be used to induce acts of violence, ranging from simple one-time mass

murders (such as, in post-offices and on subway systems) to long-term serial killings involving cannibalism and other gruesome deeds. Rape and child molestation will be facilitated by means of directed-energy (radar) targeting of reproductive organs. The perpetrators of these crimes, by claiming to hear "voices" and to be the targets of radio-frequency harassment, will serve two distinct purposes; viz., (1) they will enhance official deniability, since the public is not yet prepared to believe their claims of mind-control experimentation; and (2) they will hasten the process of the public's abandoning privacy for the sake of safety. Prison inmates will routinely be targeted for experimentation. Those sociopathic and psychopathic prisoners who show the greatest potential for future social disruption will be the most likely to be paroled or to be allowed to escape before we proceed with Step 12, below.

13. Mix the foregoing ingredients in calculated fashion until the order is given (in or about the late 1990s) to commence with Total Chaos. On that day, the order will be given to activate ALL directed-energy systems at maximum amplitudes; i.e., in office buildings, private residences, on the streets and highways, in psychiatric wards, in prison and jail systems, and in public establishments. Satanic cult members, who, until now, have been held in relative abeyance, will be given the order to concurrently run rampant, for purposes of raping and butchering U.S. citizens a la Rwanda, while the latter are preoccupied with trying to comprehend their extreme throes of pain, radio frequency burns and rupturing internal organs. Satanic cult members will be aided in this process by escaped prison inmates and psychiatric patients who, on the day in question, will find that the doors in their detention facilities are no longer locked. Once this (relatively low-level) Chaos has commenced, all previously-regulated communications frequencies will be overridden by a single transmission, coming from an underground bunker, specifically, the voice of an "extraterrestrial" announcing that this country has been invaded from outer space. TVs and radios which are not operating at the time of this announcement will be activated by means of technologies recently adopted for "national emergency" purposes. Viewers of TVs will be addressed by a person garbed in special-effects extraterrestrial costuming and make-up. The average U.S. citizen, being gullible in cases involving "War of the Worlds" scenarios and having no knowledge of the effects produced by highly-amplified directed-energy systems, will firmly believe that an extraterrestrial invasion is underway. UFO cultists, persuaded that their equivalent of a God has arrived, will rush to their terminals and assigned directed-energy emitters (on which they have been systematically trained), to assist the "invaders" in this takeover (while saving their own necks). Imported East Bloc mercenaries will also be set loose upon the terrorized public, to wreak their own uniquely-brutal brand of Havoc.

14. Now comes your RMA. The DoD will intervene to put an end to the carnage merely hinted at under Step 12, above. It is here that the Army will be brought into the process. Being of the opinion that upholding and defending the U.S. Constitution is his or her first priority, the average U.S. Army soldier will

willingly and obediently obey any order to intervene, particularly if the order is given in the context of a posse comitatus. Simply put, the military will be induced to take over this government in unsuspecting fashion, for purposes of trying to restore order to circumstances which evolved over the past 30 years under their very noses. Uncorrupted law enforcement officers will take part in this activity just as enthusiastically as the military, in the belief that their services are needed to restore law and order. U.S. citizens who are currently tagged as "dissident" will be re-tagged as "terrorist" for removal to the concentration camps which are rumored to be under construction in this country, guarded by government-contracted security firms such as Wackenhutt. The average soldier, having no basis for disbelief, will readily participate in these roundups. Because the U.S. military has demonstrated a remarkable inability to handle concentration camps on a long-term basis, particularly when disruptive elements are housed in the detainee population (ex: Guantanamo and Florida), executions of detainees will commence. From then on, ...it really doesn't matter, does it? The Revolution is underway.

In the foregoing, I have described a scenario in which the U.S. Army will find itself playing a very important role in an RMA; i.e., without having to alter current doctrine and leadership training programs. I would be interested in hearing your views regarding the feasibility and/or acceptability of this proposed scenario.

Sincerely,

/Original Signed/

JULIANNE MCKINNEY
Director
Electronic Surveillance Project

Director, Strategic Studies Institute

"...Covert actions are counterproductive and damaging to the national interest of the United States. They are inimical to the operation of an effective national intelligence system and corruptive of civil liberties, including the functioning of the judiciary and a free press. Most importantly, they contradict the principles of democracy, national self-determination and international law to which the United States is publicly committed." (Credo of the Association of National Security Alumni)
