

Email from Ramola D to Terri Ellis, DCF

Follow-up information to your visit today

Sent Saturday, April 28, 2018 at 1:51 AM

Dear Terri,

It was very nice to meet you today, on your home-visit to our home, although as you know, as I stated up-front, DCF has opened this case on a False Report.

I wished to follow up with a brief note based on the recent report you shared with us today.

As you know, the allegations in that report of my mental stability and health are serious, and extraordinary: not merely are they completely and absolutely false, they offer false medical analysis from an unqualified, uninformed reporter, and they are extreme. To suggest that I have a serious untreated mental illness is more than inappropriate: mentally ill, delusional, and psychotic people do not engage in meticulous research, thoughtful interviews, organized writing and speaking, planning, scheduling, relationship-building, and empathetic listening, all aspects of my ongoing work in investigative journalism as a Science and Technology reporter. Nor do they win highly competitive national fellowships in Poetry from the National Endowment for the Arts nor do their books win national prizes such as the AWP Grace Paley Prize in Short Fiction, nor do they have new books forthcoming with reputable presses, as I do. Nor, most importantly, do they have brilliant, talented, loving, well-rounded children whose talent in Poetry, Fiction, Art, and Writing is nurtured and guided daily by their mother.

It seems like my visit with Central Middle School Principal Richard DiCristafaro, Jr., on April 12, 2018 was greatly misunderstood by him.

I would like therefore to make a corrective Statement of Fact for your office and agency regarding my informational meeting with the Principal, which was partially attended by the Vice-Principal as well.

The meeting was cordial in its entirety, and involved my handing Mr. DeCristafaro, Jr., information related to my Art, Creative Writing and Natural Science workshops for children, and important information regarding a subject endorsed and supported by Government whistleblowers pertaining to the wrongful use of electromagnetic anti-personnel technologies on Americans—which are military technologies being used today by criminal miscreants in power to silence community activists, whistle-blowers, and civic-minded citizens who express their views openly in simple exercise of their First Amendment rights.

This latter information accrues from subjects related to my investigative journalism and reportage, and is fully related to my investigative journalism and reportage, which can be found on my website at everydayconcerned.net and Youtube/RamolaDReports. All information I provided Mr. DiCristafaro and Mrs. Susan Shea Conner is sourced and supported information which can be verified. Whistleblowers from the FBI, CIA, and NSA support this information, and have written and spoken publicly about the matters contained in my informational flyers. This is very important to stress: I do not report information which is not sourced or verified: everything I report is based on the knowledge of high-level Intelligence officers, military scientists, engineers, researchers, and analysts who can attest to the veracity of my reports.

This information was provided to Mr. DiCristafaro as a Community Service and Public Service, because it is information in the public interest.

Please see especially my interviews with Karen Melton-Stewart, NSA Intelligence Analyst; Barbara Hartwell, CIA Intelligence Analyst; Geral Sosbee, FBI Special Agent; Dave Case, Electronics Engineer; Richard Lighthouse, NASA Engineer; Dr. Edward Spencer, Yale/Stanford Neurologist; Dr. Eric Karlstrom, Professor Emeritus of Geography, California State University; Sherri M Guarnieri, Alzheimer's Advocate Whistleblower for absolute, irrefutable evidence of the military technologies and their use I research and write about. Please also see my coverage of military whistleblowers who are speaking out: DOD/CIA whistleblower Robert Duncan, Paul Batcho, a physicist at DARPA, UK Navy Microwave Weapons Expert Barrie Trower, MIT and US Navy physicist Richard Alan Miller, and Dave Gaubatz of the US Airforce. Regarding the FBI, please see the posted affidavit of Ted Gunderson, FBI Special Agent in Charge, as well as the interviews with Geral Sosbee, FBI, and the words and witness testimony offered by Mike German, FBI, in various articles. Additionally, please see my publications of the important work in the area of tracking technologies by Dr. Rauni Leena Luukanen Kilde, Chief Medical Officer of Finland, and in systems analysis and high technology by Dr. Katherine Horton, Particle Physicist from Oxford and CERN. There are many others. I do have a solid body of work behind me, with powerful factual evidence which illustrates the truth of what I am reporting.

It is most regrettable that Mr. DiCristafaro and Ms. Susan Shea Conner did not follow the above, that the information I provided, although related to sophisticated military technologies of which they may have no awareness, is solidly supported and verified information. It appears that their inability to learn more about these matters through research led to wild and unfounded accusations of mental illness and instability.

As you have seen for yourself however, our child is healthy, cared-for, loved, supported socially and familially, and contented. She is also a brilliant and diligent student, with qualities of caring, conscientiousness, and community. She has won a major international art contest at 11 (the Model UN Montessori Art Contest), published a beautiful poem at 13 in a national children's magazine, and has completed the writing of many exquisite short stories--all with my personal guiding and nurturing as an artist, poet, and fiction-writer myself. My after-school creativity workshops were begun for her and her friends in Adams Montessori School when she was seven, after I noticed the paucity of after-school art workshops in the area; she has taken nearly all my after-school and summer-camp art, poetry, and story-writing workshops between the ages of 7 and 11. In addition, as I explained, I have been the primary parent taking her to an evolving blend of extra-curricular activities as she progressed from preschool through elementary to middle school, including ballet, singing, gymnastics, soccer, swimming and currently language and Math classes; today my husband and I share these duties amicably.

The notion therefore of there being "concern" of me being around my child is injurious in the extreme. Far from being a "psychotic" with an "untreated mental illness," as per the slanderous false accusations made about me, I continue to be a highly engaged, caring, loving, patient, and nurturing parent. My parenting and caregiving indeed, along with my husband's, and our very stable home life, has led and continues to lead to the most positive impact and outcome for our child.

While we appreciate your interest, there is absolutely No child neglect, and No untreated mental illness in this home. We trust you have seen for yourself the truth of this reality. And we request that DCF cease any further initiatives to invade our privacy as a family, which we believe would be disruptive and detrimental to the health, well-being, and continued growth and flowering into fullest potential of our child.

I enclose a copy of NSA Intelligence Analyst whistleblower Karen Melton-Stewart's letter as well as FBI Special Agent whistleblower Geral Sosbee's letter in pdf form so you may replace the email cut-

out I handed you today, and will pass on any other letters validating my reportage and caregiving which come my way.

Best wishes,
Ramola
