FBI Whistleblowers are making it known that they have much to tell the appropriate Congressional Oversight Committees in regard to criminal activity by the FBI, under the Bush and Obama administrations, specifically:

the effort to conceal the “massive off-the-books civilian surveillance program” run by the FBI, *contrary to law and the Constitution.*

SOURCES IN THE KNOW, specifically a retired National Security Agency Intelligence Analyst, **Karen Melton Stewart** and retired FBI Special Agent, **Geral Sosbee**, have previously described the war which the FBI has been waging on America in order to forward its own police state agenda, and the depths of criminality and covert War on innocents that it is willing to stoop to, in order to attain that agenda.
