INVESTIGATIVE REPORTER STATEMENT FOR MR. TODD GIFFEN

1. My name is Ramola D/Dharmaraj. I am an author, publisher, investigative reporter, writer, poet, educator, and human rights activist. My degrees are as follows: Bachelor's in Physics (B.Sc.), Master's in Business Administration (MBA), Post-Graduate Diploma Training in Journalism, Master's in Creative Writing (MFA). I have published widely in American literary journals and received national and regional awards for my writing including a National Endowment for the Arts Award in Poetry (2005) and an Associated Writing Programs Award, the Grace Paley Prize in Short Fiction (2009); I have two books in print (*Invisible Season*, *Temporary Lives*) and a third (*For the Sake of the Boy*, Paycock Press) forthcoming. I have taught College English and Creative Writing in several Universities and educational institutions in the Washington DC area such as George Washington University, American University, George Mason University, and the USDA Graduate School as well as worked in management consulting as a technical and business analyst, writer and trainer, and in freelance journalism for over 25 years. I have specifically worked as an investigative reporter and publisher in the areas of science, technology, surveillance and military technology, consciousness, ethics, and human rights for the past five years, as evident in reportage at my media site and blog *The Everyday Concerned Citizen* (everydayconcerned.net), my Youtube/Vimeo/Bitchute channels *Ramola D Reports*, and at various sites online including *Washington's Blog*, *The Sleuth Journal*, *Intellihub News*, *Medium*, and *Steemit*. My articles, fiction, and poetry have been widely re-published online and in literary anthologies.
2. In the course of my investigative reportage, I have studied military and Intelligence documents, spoken with and reported the testimonial of US Government whistleblowers and scientists, including from the NSA, CIA, FBI, Department of Defense, US Air Force, US Navy, NASA, and US Army, as well as former French and Belgian Intelligence; I have researched and reported the work, words, and testimonial of scientists from the CIA, US Navy and UK Navy, as well as widely researched and reported on the work of scientists and militaries worldwide, particularly in the areas of electromagnetic weaponry or DEWs, neurotechnology, EMF/neuroweapons testing, wireless telemetry, and surveillance technology. I have investigated and reported on human subject protections and non-consensual neuro-experimentation among other modern science and technology issues, interviewed a wide variety of professionals including science and technology journalists, authors, academics, neurologists,

psychologists, psychiatrists, electronic engineers, scientists, writers, other journalists, and published the testimonials of many people worldwide reporting non-consensual military/Intelligence neuro-experimentation with Radio Frequency and Sonic technologies today. From my perusal of military and Intelligence documents, listening to and reading audio/video/print testimonial of whistleblower scientists and Intelligence analysts, researching the history of weaponized Neuroscience, and speaking personally with whistleblowers, and multiple reporting victims, I can attest to the reality of ongoing Neuro-technology testing and training as well as non-consensual neuro-experimentation with electronic warfare weaponry, Brain Computer Interfaces, and RFID tracking micro/nanotech on civilian populations in the US, Europe, and worldwide.

3. As a reporter and human rights activist, I have spoken with Todd Giffen on several occasions over the past few years and have perused his testimonials and amassed references to articles and videos on his websites on the subjects of NSA surveillance, Remote Neural Monitoring, and NSA and CIA interest in Remote Viewing and ESP, as well as non-consensual neuro-experimentation and the covert use of anti-personnel Non-Lethal-Weapons or Directed-Energy Weapons on American citizens.
4. I have been aware through this time of Mr. Giffen's interest in raising public awareness of these matters through such means as interviewing reporting victims of these crimes as well as whistleblowers, attending rallies where others targeted were protesting, such as on the Mall in Washington, DC, and alerting the general public to ongoing neuro-experimentation crimes at symposia like the Left Forum.
5. I have also been aware that Mr. Giffen has been interested in legally addressing human rights violations committed against him, which I am also aware is an issue of abiding interest to many reporting victims whose stories I have heard, recorded, and published, in the interests of public education and awareness.
6. I have also been aware that Mr. Giffen, while given to questionable use of language at times, is held in high esteem by many hundreds of reporting victims of Surveillance abuses and military/Intelligence non-consensual experimentation abuses, who appreciate his inquiring mind, his vast knowledge of US Law, the US Constitution, and citizen rights, his awareness-raising efforts, and his activism on their behalf to publicize war crimes and human rights violations.

7. Evidence of Ongoing Military/Intelligence Electromagnetic Neurotechnology Experimentation on Citizens, Remote Neural Monitoring Surveillance & Field Weapons Tests

As an investigative reporter and researcher used to the close examination, scrutiny, analysis and summary of reported information on these subjects, and privy as well to the public-domain disclosures of the US Military and Intelligence Community, I have come to the following evidence-based conclusions, and can testify to the veracity of these statements:

A. EMF, Directed-Energy, and Neurotechnologies Do Exist and Are in Use: When Mr. Giffen reports non-consensual neuro-experimentation on his person—as he has recently to court officials, as well as via public-education mailings and handouts to citizens and government officials—he is not alone, thousands are reporting such covert 21st-Century technology use on their persons today. Proof that such technologies are being tested and used covertly on citizens does exist.

As an investigative science and technology reporter covering Military and Intelligence technologies, I can attest that Mr. Giffen is not engaging in delusions when he speaks of electromagnetic technologies, neurotechnologies such as Brain Computer Interfaces, Remote Neural Monitoring, or directed-energy-weapon technology which can be operated remotely from a distance, in silence, yet some of which can be recorded on meters and spectrum analyzers: these technologies exist.

There is a history of human rights activism, whistleblowing, and reportage on this subject which points to covert operation across several decades of these neuro/bio weapons on citizens. Public reports of modern neurotechnologies, both academic and military have lately also been increasing.

This is a vast subject and merits detailed inquiry.

The fundamental fact that should be noted here is: It is absolutely not a sign of “delusion,” “paranoia,” or “schizophrenia” when anyone reports or mentions the existence of or suspected use on their person of electromagnetic technologies or remote neural monitoring neurotechnologies such as Remote Viewing, NSA ESP, BCI (Brain Computer Interface) or Neuro Imaging technologies, or wireless telemetry (RFID microchips, WBANS, nanotechnology, bio-sensors and implants). There is ample evidence today of the use of electromagnetic (radio frequency), scalar, sonic, nano/bio and other weapons on non-consensual human subjects, some of this is provided below. Whether these technologies are indeed being used on someone and whether someone is implanted can be determined by scientific diagnostic means such as medical radiology, toxicology analysis, Faraday cage Radio Frequency emission measurements and the use of spectrum analyzers and microwave detection devices, as several human rights organizations and groups in Europe and the US such as ICAACT (icaact.org) and ICATOR (icator.be) have been reporting.

Uninformed doctors and psychiatrists as well as uninformed city, court, or Law Enforcement officials need to understand that not only do these technologies exist, they are being used covertly against citizens today in highly invasive ways which constitute distinct crimes against humanity.

B. General Evidence via Whistleblowers, Documents, Reports, Articles on EMF Neuro Bio Technologies:

General evidence of the existence and use of military, Intelligence, and medical EMF neuro/bio technologies on citizens includes recorded literature in the public-domain, declassified documents, whistleblower testimonial and affidavits, Defense contracts, patents, and Criminal Justice reports. Some sources and information are presented below.

What Impact Will Psychotronic Weapons Have on Crisis Negotiation Teams by the year 2020?/by Michael Basgall, Clovis Police Department/April 2013

<https://everydayconcerned.files.wordpress.com/2019/03/what-impact-will-psychotronic-weapons-have-on-crisis-negotiation-teams-52-basgall.pdf>

In this Command College journal article published in 2013, a Law Enforcement officer, now a Police Chief, Michael Basgall, in Clovis, California examined closely the question of psychotronic neuroweapon use by Police Departments as a “future” tool for use by PDs, including examining Voice to Skull technologies, and concluded that they had “the potential to be a great tool for law enforcement” but would “require complete public support” since “the public may be strongly adverse to its use by law enforcement due to its extremely intrusive nature.”

2014 NSA Confirmation of 2012 Intelligence re. Mr. Beck’s Late ’90s Travels in “Hostile” Country with Stealth Assault Nervous-System Damaging High-Powered Microwave Weapon

<https://everydayconcerned.files.wordpress.com/2019/03/full.pdf>

Also notable is that the NSA, in 2014, revealing thus its own expertise in this area, advised that a certain American traveling abroad had been in a country which did possess a high-powered microwave weapon system which could produce the symptoms he had reported: “to weaken, intimidate, or kill an enemy over time and without leaving evidence.” As many American and foreign targets of the NSA and their covert agency partners today report, NSA acknowledged that this weapons system is intended to “bathe a target’s living quarters in microwaves, causing numerous physical effects, including a damaged nervous system.”

Covert Mind Control Operations of the US National Security Agency

Nexus Magazine, April-May 1996, Reporting the Historic 1992 John St. Clair Akwei Lawsuit vs NSA

<https://everydayconcerned.files.wordpress.com/2019/04/nexusmagazineakweinsalawsuit.pdf>

“NSA personnel can control the lives of hundreds of thousands of individuals in the US by using the NSA's domestic intelligence network and cover businesses. The operations independently run by them can sometimes go beyond the bounds of law. Long-term control and sabotage of tens of thousands of unwitting citizens by NSA operatives is likely to happen. NSA DOMINT has the ability to assassinate US citizens covertly or

run covert psychological control operations to cause subjects to be diagnosed with ill mental health....

There has been a Signals Intelligence network in the US since the 1940s. The NSA, Ft Meade has in place a vast two-way wireless RNM system which is used to track subjects and non-invasively monitor audiovisual information in their brains. This IS all done with no physical contact with the subject. RNM is the ultimate method of surveillance and domestic intelligence. Speech, 3D sound and subliminal audio can be sent to the auditory cortex of the subject's brain (bypassing the ears), and images can be sent into the visual cortex. RNM can alter a subject's perceptions, moods and motor control. Speech cortex/auditory cortex link has become the ultimate communications system for the intelligence community. RNM allows for a complete audiovisual brain-to-brain link or brain-to-computer link.”

Government Whistleblowers Speak Out:

It is a well-known and prolifically documented fact that such electro-magnetic weaponry exists and has been operational for decades, used by the military and intelligence agencies (including but not limited to FBI, CIA, NSA, DIA, DARPA) against persons deemed “dissidents,” whistleblowers, journalists and expositors of vital information which should be of concern to every American who values the God-given, unalienable rights and liberties enshrined in the Declaration of Independence and the U.S. Constitution, and specifically the Bill of Rights contained therein....I am one of many former intelligence professionals, an independent investigator, intelligence analyst and journalist, who, for more than a quarter century, has been documenting and publicly reporting on the high-tech anti-personnel weaponry used against us.

•Barbara Hartwell, CIA Whistle-blower, Independent Investigator, Intelligence Analyst, Journalist/ [Letter from Barbara Hartwell for Ramola D](#)

“Technology in the public-domain is at least 50 years behind the technologies in the hands of secret services and militaries. Implants were used by CIA in 1952, now implants in hands are used in 2000 to open doors, garages. Back in 1975,

Russian foreign minister Gromyko reported that the subject of psychotronic or non-lethal weapons being a weapon of mass destruction was brought up in the UN and many countries agreed they should be banned, but the US did not. Militaries and secret services have always secretly experimented on people—it is absolutely criminal.”

“In the middle of March Polish minister of defence Antoni Macierewicz visited the University of Father Tadeusz Rydzik to participate in the discussion on the subject "Problems of actual politics, military conflicts and terrorism". One of the listeners asked him if Poland has a strategy addressing the illegal experiments with electromagnetic weapons on Polish citizens. The minister replied that his ministry is performing an analysis aimed at finding out in what regions of Poland the people, who are complaining about such attacks, are living and that, according to preliminary information, most of the complaints originate from Lower Silesia and northwestern Poland. He also stated that in about half a year he will know more <https://www.youtube.com/watch?v=YgVs4-m0lNY#t=33>.”

The high-tech, covert technology to which Mrs. Dharmaraj refers, has been used secretly for decades against our enemies when overt actions were simply too risky...I will tell you that I have been working closely with Ramola Dharmaraj for almost two years and am quite impressed with her multifaceted talent, integrity, superior intellect, brilliant writing capability and exceptional research ability. What she is telling you about highly advanced, covert technology being used on “inconvenient” people, people of integrity (whistle-blowers), truth-tellers (certain journalists), activists, potential leaders in a community, independent and aware thinkers, patriots, and Constitutionalsists, as a means to intimidate, isolate, torture, murder and “make examples of” them to the general population, is 100% true...

CIA/Military AI/Cybernetics Scientists, Neuroscientists, and Medical Personnel Provide Public Disclosure

"In February 2019, a former medical planner for the military, Debra D Schnelle, testifying to a committee on Emerging BioDefense mentioned Neuro Cognitive Weapons, saying the US Navy Surgeon-General's Office has stated that Neuro Cognitive Weapons which could induce advanced Alzheimer's in a matter of days constitute an emerging biological weapons threat in the operational battlespace to US soldiers, setting the public seed thereby for coerced public consent to military Neuroweaponry research."

--Ramola D/No Longer True: The NSA "Isn't Getting Violent Internally in the US": Millions Today in US Are Targeted with RF/Scalar/Sonic Weapons, Nano Weapons, Neuro Weapons, Chem/Bio Weapons

"The military applications were quite transparent. I worked on the AI (artificial intelligence) natural language responses. They are broadly called "chatter-bots". They are useful in occupation of the target mind for disablement, NLP (neural linguistic programming), and interrogation....The CIA formerly used mostly LSD and other substances that would perform similar functions....A weapon more powerful than the atomic bomb for influencing populations is quite sought after by many countries. It is another arms race. When weapons are "field tested" they need to be very secretive. The database for the probability matrices of the efficacy on each culture and language needs to be done for improvements, development, and evolution of the AI system. Doing it world-wide is necessary for other reasons too."

Public Disclosure on Neuro Weapons and Neuro Technologies In Use Today
<https://everydayconcerned.net/about/ramola-dreports/todays-science-and-technology/public-disclosure-on-neuro-weapons-and-neuro-technologies-in-use-today/>

“The brain is the next battlespace.... We are targeting the brain.... Like (in) any race, the morbidity and mortality, going at this speed, with this level of integrity and this level of momentum, is real. We are tracking neurological or brain signatures of key targeted individuals that are thought to represent whole groups....I can utilize neuro-pharmacologics and various forms of brain stimulation to extract information from key intelligence targets....TITAN (Tiered-integrated Tracking and Access Networks) utilizes biologically-implantable chips to track key individuals and provide information about the way brains work to create narratives and behaviors....In Europe, the Nutfield Council of Bioethics said we are getting very close to weaponizing the brain sciences and in a year it would be ready for use. In 2014, the NAS reconvened and made the announcement that the brain sciences are now ready and are currently being used in such endeavors in the US and worldwide. So we are moving into the operational space. I.e., it is being used....High-output sensory stimulators (can be administered by UAVs (unmanned aerial vehicles), drones, or insect borne, or by large vehicles; cars, or tanks). These use sensory mobilizing agents that use high electromagnetic pulse energy that may also use high levels of sound and light energy and they disrupt neuro sensory functions. These are being used.”

C. In the face of existent Neurotechnologies and Directed-Energy Weapons therefore, there is no evidence to this reporter that Mr. Giffen is delusional when he mentions these nor that his “ideas” regarding EMF/Neurotechnologies, as contained in his public-education and humanitarian activism efforts (via websites and posted documents) to raise public awareness of EMF neuro/bioweapons testing and non-consensual experimentation going on are in any way delusional: military documents, scientists, neuroscientists, journalists, and Intelligence agency whistleblowers confirm the truth and accuracy of his reportage.

Todd Giffen's mental competency should not be called into question by his reportage or mention of these existent neurotechnologies and secretive testing programs, knowledge of which indicates scholarship, not “schizophrenia.”

I testify that all I have stated here is true, to the best of my knowledge and belief: All documented information I have provided here (with sources) is true, all editorial reference to my own investigative research and reports as previously published is true, and all my analyses of reportage of his own experience from Mr. Todd Giffen is based on the truth and veracity of his testimonial, which is my belief based on my knowledge of his character as a person of warm compassion for all victims of human rights abuses, a scholarly activist, and a highly intelligent and thoughtful researcher.

Signed,
